Invasive Species Management Plan

[Property Owner]
[Physical Address]
[Permit Application Number]

Inventory Completed By: [name] [company/agency]
Management Plan Prepared By: [name] [company/agency]

Invasive Species Inventoried: [list all]

Pre-Construction Management Strategies:

applicable to construction beginning after May 1 and before November 15

1. Known infestations will be treated at least two weeks prior to construction using methods listed below.

Active Construction Management Strategies:

1. All construction equipment will be cleaned prior to entering the site.
2. Soil stockpiles will be routinely checked and treated for invasive species.
3. Disturbance outside of the construction zone and in areas where invasive species are present will be minimized.
4. All areas outside of the construction zone will be kept on active management using the methods listed below. This area will be monitored and treated at least twice each growing season.

Post-Construction Management Strategies:

1. Revegetation will occur immediately after construction is complete to prevent the establishment of invasive species in the disturbed areas.
2. Nursery stock will be used in accordance with W.S. 11-9-101 - 109 (Wyoming Nursery Stock Law), accompanied by a valid health certificate, and acquired through a dealer licensed by the Wyoming Department of Agriculture. Seeds will be used in accordance with W.S. 11-12-101 - 125 (Wyoming Seed Law), certified weed free, and acquired through a dealer licensed by the Wyoming Department of Agriculture.
3. Certified weed free straw, gravel, and soil will be utilized as possible.
4. TCWP will be contacted to create a post-construction inventory.

Management Strategies by Species:

[list management strategies by species present (can be copied from Control Options Table or alternative may be presented for TCWP approval)]
