

Critical Services Provider (CSP)

A CSP is defined as an employee or volunteer of a Housing Department approved community-based organization that provides immediate response, health, and safety services. The employee or volunteer must be on call 24 hours per day for public safety emergencies.

Qualified CSPs receive one additional entry per adult into an Affordable, Workforce, or rental weighted drawing with a maximum of two per household.

To be a qualified CSP, the organization you work for must submit a CSP Organization Application and be approved by the Jackson Teton County Housing Authority Board. The Housing Authority Board will review your application at their regular scheduled Board meeting. The Housing Authority Board meets the first Wednesday of each month. Once the organization and positions are approved, the CSP must have a supervisor complete the CSP Verification/Questionnaire and submit it with their applicants weighted entry. These verifications are valid for six months.
